have been designed to stack and rack across truck beds and to fit inside shipping containers, allowing them to be easily loaded for fast deployment. .

## Standby Fuel

The AceCube Range is the perfect choice for a secondary or standby fuel source as the innovative system design protects against spillage and fume evaporations or emissions through the valves and venting systems, making it the ideal choice for standby fuel storage on quarries, building sites or farms.

## Enhanced Design Features

### Unique Design Standard

The AceCube Versatile Tank comes complete with two galvanised hatch lids and galvanised stacking corners. The innovative design also allows the primary hatch lid to open up to a component ports plate. This component ports plate doubles up to act as a manhole cover. This innovative doubling up of design features has created space on the top lid of the AceCube tank for a secondary hatch plate.

### Maintenance & Environment

To ensure efficient and unencumbered cleaning, maintenance and inspection the ingenious three tier component design allows the inner tank to be completely removed and disconnected. This flexible design ensures a

### Dispensing & Accessibility

The AceCube Versatile Tank comes equipped with a spacious equipment chamber which engages a bespoke universal bracket system that can support retractable hose reels, along with a variety of pump dispensing kits, electric and rotary hand pumps.

### Transportable & Portable

The AceCube Versatile IBC Bunded Fuel Storage range from 450L to 3000L is UN31A/Y certified, guaranteeing it for safe and secure transportation under ADR regulations on all major roadways, even when full.
